# 1500mm Your benefit

**“We control the full extent!”  
is not only a line or slogan...**

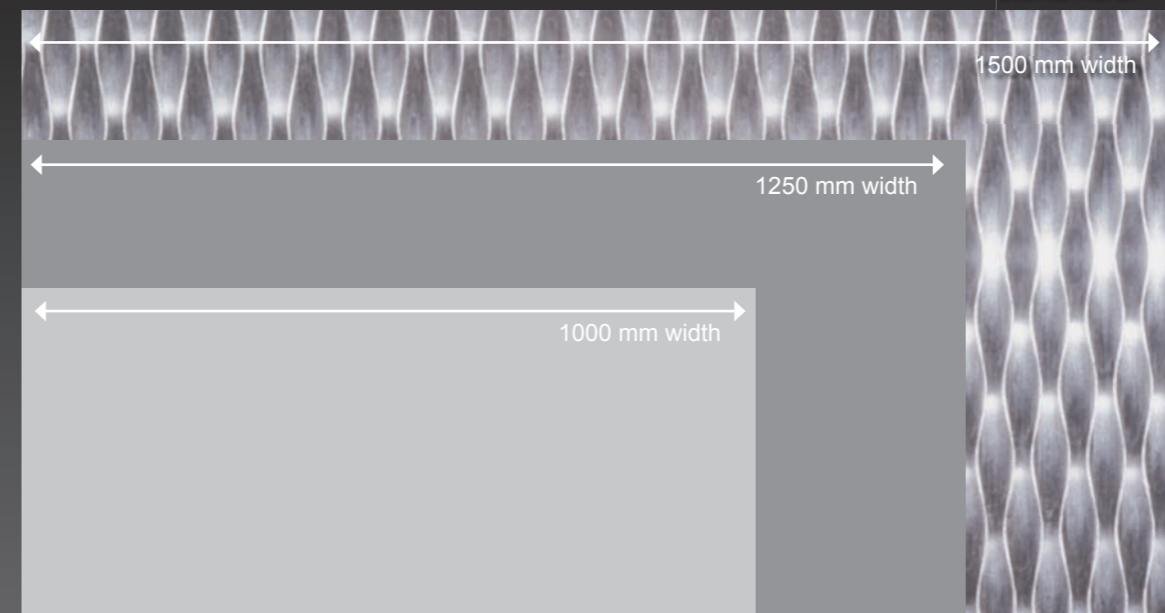

Effective immediately, Schmidt Edelstahl offers you the 5WL pattern at a width of up to 1500mm. To you this means several advantages not to be underestimated, e.g. cutting optimisation, optical enhancement of the object due to fewer abutting- & joint edges or the undeniable price benefit.

# 1500mm Manufactured in-house

For more than 25 years Schmidt Edelstahl has been offering you experience & innovation in the field of pattern-rolled and shaped stainless steel surfaces. Using our own rolling mill

**•location Germany•**  
we guarantee you short delivery times, even with fixed

dimensions via uncoil systems (6000x1500mm) and thus punctual delivery by our own vehicle fleet. With its 21-roll straightening machine, our rolling mill complies with the latest quality standards and, due to its continual surface replicability, is certified in acc. with DIN EN ISO 9001.

# SE-5WL

**Specially suited for:**

- Transport/conveyor technology
- Automobile industry
- Vehicle construction
- Cover panels
- Façades
- Cold room floors
- Dividing wall construction

**Advantages due to:**

- reduced adhesion as a baffle- and slide plate
- increased stability and rigidity compared to smooth sheeting
- cost-saving due to thinner material
- enhanced cutting optimisation

### Standard formats

- 2000 x 1000 mm
- 2500 x 1250 mm
- 3000 x 1250 mm
- 3000 x 1500 mm

### Thicknesses

0,5-2,0 mm

### W-No.

- 1.4016
- 1.4301
- 1.4401/04
- 1.4509
- 1.4571

### Surfaces

- 2R
- 2B
- R13
- el-pol
- dyed
